KIP Announces Windows 7 Integration

---

**Novi, Michigan November 5, 2009** — KIP, a world leader in wide format print, copy and scan systems announces full integration for the new Microsoft Windows 7 operating system release. KIP solutions work seamlessly in Windows 7 print environments. KIP IPS system users can continue to run their print operations, with PCs running the new Windows 7 operating system with no negative impact, utilizing the currently shipping, WHQL-certified drivers, without making any changes to their workflow processes.

As part of our ongoing commitment to support Microsoft systems, KIP is offering customers who install Windows 7 an easy, seamless way to ensure production printing of documents they need from day one. Most competitive solutions require a complex upgrade or won't support the new Windows 7 operating system for the foreseeable future. After undergoing rigorous testing, KIP system users are pleased with the pain-free adoption of working with this latest Microsoft operating system.

KIP is the modern leading innovator in monochrome & color wide format printing and image capture technology. In addition, KIP is a major provider of wide format digital solutions for the architectural, engineering and manufacturing industries – solutions that deliver efficient, dependable and consistently high quality performance.
